## Profile

## Investment Process

Our Small Cap Value team employs a proprietary valuation process to identify the most inexpensive stocks in each sector which results in a candidate pool of 175 names. To discern true value from the merely cheap, the team conducts extensive fundamental research in search of one of our five Value Buy Criteria:

- Resolvable short-term problem
- Catalyst for change
- Unrecognized assets
- Fundamental undervaluation
- Take-over potential

The presence of our Value Buy Criteria increases the likelihood that an inexpensive stock will return to a state of fair value and outperform its peers.

Portfolios are fully invested in 90 to 110 holdings with no position exceeding 3.5% in weight. The portfolio is always diversified across all sectors at all times.
