The Large Cap Growth composite is compared to the Russell 1000® Growth Index. The benchmark is most reflective of the objectives and holdings of the style. The composite includes all fully discretionary portfolios invested in Peregrine’s Large Cap Growth strategy. Net performance includes the effect of advisory or performance fees, while gross performance does not. Both gross and net performance reflect the reinvestment of dividends and interest, and the deduction of brokerage or other commissions, and any other expenses that a client would have paid or actually paid, other than custodial fees. The Large Cap Growth strategy was begun by the Large Cap Growth team in 1983 while they were employed by Peregrine’s former parent company and managed the same strategy. In order to comply with the requirements of Rule 206(4)-1 under the Investment Advisers Act of 1940, (the “New Marketing Rule”), the Large Cap Growth composite inception has been updated from 1/1/1983 to 10/1/1988. Past performance is no guarantee of future results. As with any investment there is always potential for gains as well as the possibility of losses.
