The SMID Growth composite is compared to the Russell 2500™ Growth Index. The benchmark is most reflective of the objectives and holdings of the style. The composite includes all fully discretionary portfolios invested in Peregrine's SMID Growth strategy. Net performance includes the effect of advisory or performance fees. For the period presented, the composite consisted only of seed money, which does not pay an advisory fee. Therefore, the net performance number was calculated by applying the highest fee that Peregrine charges for this strategy. Actual fees charged are based upon a tiered fee schedule reflected in our Form ADV, Part 2A. Both gross and net performance reflect the reinvestment of dividends and interest, and the deduction of brokerage or other commissions, and any other expenses that a client would have paid or actually paid, other than custodial fees. Past performance is no guarantee of future results. As with any investment there is always potential for gains as well as the possibility of losses.
